Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Abstract

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet **within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Specification

The disclosure is objected to because of the following informalities: it is suggested to amend the specification at page 3, lines 26 – 29 and 31 – 32, to reflect that figures 1 and 3 are "Prior Art" as noted page 1, line 19 and page 2, line 13. Appropriate correction is required.

Drawings

Figures 1 and 3, described in "BACKGROUND INFORMATION" noted on pages 1 and 2, respectively, should be designated by a legend such as --**Prior Art**- - because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Conclusion

This application is in condition for allowance except for the following formal matters: as per the above objections to the drawings and the specification.

Newly submitted claims 10 – 24 are allowed over the prior art of record as the prior art of record fail to teach determining a point of engagement of a clutch operable via an actuating device having a positioning motor whose output provides a motor torque and a motor speed, comprising, among other limitations, arbitrarily actuating the positioning motor by a control unit for determining the point so that the clutch is engaged and performing, when a predeterminable rotational angle position of the positioning motor or a derived quantity derived therefrom is attained, at least one of

in a first operating mode, applying a constant voltage to the positioning motor by the control unit and, at the same time, detecting motor speed as a function of the rotational angle position, and

in a second operating mode, applying by the control unit a constant current to the positioning motor and detecting motor speed as a function of the rotational angle position; and

determining the point of engagement from detected values of the motor speed that are a function of the rotational angle position.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. As per attached PTO-892.
